

# NOTICE

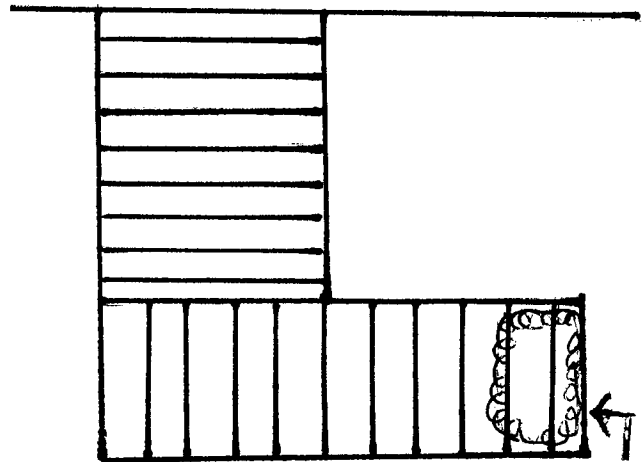

## BARLEY STRAW PLACEMENT

PROPERTY OWNERS WILL RECEIVE TWO BAGS OF BARLEY STRAW PER PIER. THE BAGS SHOULD BE SECURED TO YOUR PIER. BAGS NEED TO BE IN WATER DEEP ENOUGH TO SATURATE THEM BUT THEY ALSO NEED WAVE ACTION TO BE PRODUCTIVE. IT'S BETTER NOT TO COMPLETELY SUBMERSE THE BAGS – JUST PLACE THE LOWER THIRD OF THE BAG IN THE WATER AND IT WILL BE EFFECTIVE OVER A LONGER PERIOD OF TIME.

BARLEY STRAW BAGS SHOULD BE REMOVED AFTER LABOR DAY. YOU MAY USE ANY REMAINING STRAW FOR FERTILIZER OR GROUND COVER IF YOU WISH. BAGS LEFT ON PIERS WILL BE PICKED UP BY THE HARVESTING CREWS IN SEPTEMBER.
